

ABSTRACT

The invention provides a cooking apparatus (1) with a drum (2) for an apparatus for heating, cooking, frying or otherwise preparing a food product by the application of heat. The drum (2) is provided with at least one pocket or receptacle member in the form of a tube (3) extending through the drum (2) and having perforated walls (4) at a lower end of the tube. The tube (3) is rotatable about a horizontal axis (5), i.e. the tube (3) and drum (2) are displaceable between an upper and lower position by rotation about axis (5) over an arc.
